

Author's response to article by Heather Whips on LiveScience.com
entitled *Why 09/09/09 Is So Special*

"I suppose you could never prove to the mind of the most ingenious mollusk that such a creature as a whale was possible." Ralph Waldo Emerson

In yesterday's LiveScience.com article [Why 09/09/09 Is So Special](#), Heather Whips states "Modern numerologists -- who operate outside the realm of real science -- believe that mystical significance or vibrations can be assigned to each numeral one through nine..."

It's not only about assigning significance and vibration to a numeral...it's looking for **patterns** in the numerals. Despite Whip's casual assessment of modern numerologists, they also look at numbers beyond 1-9, especially 11, 22, 33, 44, 55, etc. something omitted by the article.

Today's worldwide attention on 09-09-2009 looks only at a single element of the date, the 9s. Indeed, there is a pattern. Add the three 9s together to arrive at the sum of 27, which again is a 9 ($2+7=9$), include the 2 for the millennium, and you've got 29. $2+9=11$. One of those other numbers numerologists look at beyond 1-9.

We have experienced this interesting alignment of numbers since the beginning of 2001. The dates for each subsequent year has added up as shown below. NOTE THE REPEATING PATTERN OF THE YEAR TOTALS 5, 8, 11. This would be significant to most numerologists to notice this, and to notice the years that add to 11, including 2009.

01-01-2001 ($1+1+2+1=5$)

02-02-2002 ($2+2+2+2=8$)

03-03-2003 ($3+3+2+3=11$)

04-04-2004 ($4+4+2+4=14=1+4=5$)

05-05-2005 ($5+5+2+5=17=1+7=8$)

06-06-2006 ($6+6+2+6=20=2+0=2$) also (**$2006+6+6=2018$ equals $2+1=3=11$**) The film OMEN opened on this date of 06-06-06.

07-07-2007 ($7+7+2+7=23+2+3=5$) Many couples married on this day and casinos were packed with people hoping to hit the Lucky 7s, not realizing the date actually adds to 5. Also the film "The Number 23" with Jim Carrey was released on this date, a date that adds to 23.

08-08-2008 ($8+8+2+8=26=2+6=8$). The start of the Olympics in Beijing.

09-09-2009 ($9+9+2+9=29=2+9=11$)

and this will continue the next three years:

10-10-2010 ($1+1+2+1=5$)

11-11-2011 ($1+1+1+1+2+1+1=8$) or ($11+11+2+11=35=3+5=8$)

12-12-2012 ($1+2+1+2+2+0+1+2=11$) or (**$12+12+2+12=38=3+8=11$**)

There have been more books published in the last two years about the "end of the world" and 2012 than one person could hope to read. Most of them are backed up with zero science or research into this ancient science called numerology, and are only capitalizing on the date. Hollywood has jumped on the bandwagon as well (for example, the upcoming movie "9"). Over the past few years, Hollywood has released several other films such as PI: FAITH IN CHAOS by Darren Aronofsky, THE DA VINCI CODE, THE CELESTINE PROPHECY, 11:14 starring Patrick Swayze and Hillary Swank, another 2009 film KNOWING starring Nicolas Cage, NATIONAL TREASURE: BOOK OF SECRETS, and ANGELS & DEMONS...all have a clear numerology theme.

If "real" science cannot explain such things as coincidence and synchronicity, and many other real experiences that people report, we need something "outside the realm of real science" to do the explaining. Better yet, someone who can bridge the gap between scientific objectivity and outrageous speculation. With skills to find things overlooked by others, Skot Jonz has observed number synchronicity since the 1970s while working as an archaeologist. His studies in transpersonal psychology and metaphysics provide a rare balance between science and spirituality.

Worldwide, number synchronicity stimulates spiritual awakening, growth, and enlightenment. These transformative experiences remind, verify, and unite. But questions remain: Why these numbers? What does it mean? Who sent it? Could it be a message we sent to ourselves? Is it a code, message or beacon? Can it be deciphered?

The point missed by the LiveScience.com article is that millions of people around the world are becoming aware of "number synchronicity" for the first time because of 09-09-09. This has occurred exponentially each year since 2000.

This reinforces my long-held belief that consciousness is accelerating and we, as a species, are evolving. I realize that concept may ruffle more than a few anti-evolutionary feathers. Since the year 2000, time and events, it seems to me (and apparently many others), are accelerating and intensifying. Few can argue this point.

We are evolving. We are tuning in to the numerical harmony of the universe. The universe is much bigger and has been here much longer than humans. We possess only a glimpse of the true nature of the universe and reality, and our place in them, yet we claim the pinnacle of intelligence for ourselves. As demonstrated in the chapter entitled NATURE, many examples are provided that support the idea that numerological significance is omnipresent throughout the universe, independent of and prior to human influence.

If you still believe that numerological significance, number coincidence, and number synchronicity are outside the "realm of real science" then you need to read *Number Synchronicity*.

- Abundant facts and convincing evidence equate number synchronicity to a beacon of light in a storm, providing guidance and comfort during times of chaos, transition, and uncertainty.
- *Number Synchronicity* is a definitive exploration of a unique phenomenon affecting young and old, from diverse cultural and spiritual persuasions, even those not inclined to the metaphysical. In pursuit of the truth, seemingly separate threads weave the fabric of a new understanding.
- Hundreds of examples are assembled in categories of nature, world religions, space exploration, sports, entertainment, trivia, history, and world news events.
- True stories illustrate the nature and persistence of the phenomenon evidencing how synchronicity often manifests with numbers.

Nearly the entire text of *Number Synchronicity* by Skot Jonz is available for free preview on GOOGLE BOOKS and AMAZON.COM or see more up-to-date info at www.skotjonz.info
